29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

**Timber (Litter and Understory)**

Narrative:

**Fire is burning in heavy timber on steep slopes.**

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):  
**Fire is located two miles southeast of the Opal Creek Ancient Forest Center and the community of Jawbone Flats.**

33. Life, Safety, and Health Status/Threat Remarks:

**The community of Jawbone Flats has ceased operations in the the Opal Creek Ancient Forest Center. Road and trail closure are in effect.**

35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern):

**Weather is expected to be cooler with maximum temperatures around 65-70 degrees and minimum humidities 65-75% with maximums reaching 90% for the next few operational periods. Friday will be mostly cloudy with a potential for a few light showers.**

34. Life, Safety, and Health Threat Management:

Active?
A. No Likely Threat
B. Potential Future Threat
C. Mass Notifications in Progress
D. Mass Notifications Completed
E. No Evacuation(s) Imminent
F. Planning for Evacuation
G. Planning for Shelter-in-Place

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:

12 hours: **Fire is expected to continue creeping and smoldering with minimal growth.**

24 hours: **No change from 12 hour projection.**

48 hours: **No change from 12 hour projection.**

72 hours: **Anticipate continued**

**Anticipate minimal growth with perimeter contained by bucket support. Direct Anticipated after 72 hours: hand line is not possible for containment and based on helicopters availability will determine outcome of post 72 hours**

37. Strategic Objectives (define planned end-state for incident):

**Strategic Objectives are to keep the fire in its current footprint utilizing bucket support and natural barriers.**

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

**Opal Creek Ancient Forest Center and Jawbone Flats community has temporarily closed their business due to the road leading there being closed. Anticipated fire growth to be confined to the wilderness area. Continued road and trail closures effecting popular recreation sites.**

12 hours: **No change from 12 hour.**

48 hours: **No change from 12 hour.**

72 hours: **No change from 12 hour.**

**If indirect attack methods are not successful anticipate Opal Creek Ancient Forest Center and Jawbone Flats to be threatened by fire. Potential for east wind events may lead to continual closure of popular recreation sites, loss and impacts to T and E species habitat, and threat of fire spread to private lands.**

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

12 hours: **Type 1 or Type 2 helicopter support is critical to keep fire in its current footprint. Ordering Manager for anticipated personnel growth.**

24 hours: **No change from 12 hour.**

48 hours: **No change from 12 hour.**

72 hours: **No change from 12 hour.**

Anticipated after 72 hours: **Direct suppression is not feasible therefore containment is difficult to project. If**
